DETAILED ACTION

Restriction\Election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-36, drawn to an electro-optic optical element changed in response to an applied electrical signal, classified in class 359, subclass 245.
 - II. Claim 37-61, drawn to method for fabricating a micromirror device, classified in class 438, subclass 52.
2. The inventions are distinct, each from the other because of the following reasons; Inventions I and II are related as product and process of making product. The inventions are distinct if the following can be shown that the method as claimed can be used to make other and materially different product. In the instant case invention II can be used to make microstructure other than micro-mirror.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
